

ATE Plastilube Lubricant

The only choice for noise-free brakes

ATE Plastilube is formulated to prevent brake squealing and provide protection against corrosion for the guide surfaces and backing plates of brake calipers and brake pads.

Protection for all Brakes

ATE Plastilube's formulation provides long-lasting protection to prevent corrosion and brake squealing. This is done by keeping metal to metal contact points well lubricated.

Long-term quality

Plastilube reduces the maintenance frequency for brake repairs and keeps all moving parts in smooth operation regardless of weather conditions.

Versatility needed for trouble free brake replacement

Features

- | Available in 35 ml and 75 ml tubes.
- | Long lasting in all weather conditions.
- | Versatile and compatible with all metals and most O-rings.

Benefits

- | Free from metal soaps and fatty acids, so it is not corrosive.
- | Insoluble in water and outstanding resistance to leaching.

ATE Plastilube Part Numbers

ATE Part No.	Description	Size
700014	ATE Plastilube	35 ml
700015	ATE Plastilube	75 ml

* Do not apply Plastilube to friction services.
