

ATE OEM Wheel Speed Sensors

OE fit, form and function.

ATE Wheel Speed Sensors are the genuine OEM part. They offer OE fit, form, and function and provide the genuine quality of OE components manufactured by Continental.

Benefit from the experience of one of the world's premier automotive brake suppliers. The control systems for ABS, TCS and ESC determine the wheel speed based on signals sent by the wheel speed sensors. This information is used to prevent the wheels from locking and determine when the wheels are spinning, taking appropriate control action to maintain the vehicle's stability and steering responses. In addition, it is possible to capture the rotational direction – this supports functions such as hill start assist and the park assistance system.

Top part numbers and vehicle application

360366

AUDI Q3 11

360233

Volvo S60 I 00-09

360385

Mercedes Benz CL550 09-14 / S350 12-13 / S550 07-13

360183

Mercedes Benz C-Klasse CL203 Sportcoupe 01-08

Features & Benefits

- | Original equipment manufacturer
- | Exact fit for simplified installation and fewer comebacks
- | Detection of rotational direction
- | Standstill detection
- | Measurement of rotational speed (even at low vehicle speed)
- | High resistance from extreme temperatures
